PROFILE

I am a dedicated and self-motivated Computer Science undergraduate specializing in Artificial Intelligence. I am highly responsible, detail-oriented, and committed to continuous learning. I possess strong analytical thinking and problem-solving abilities, along with adaptability and teamwork skills. I am passionate about developing innovative solutions and always strive to improve myself both personally and professionally.

ACTIVITIES

Smart Garbage Monitoring System

- Designed and implemented an IoT-based smart garbage monitoring system using Arduino Nano and
- ESP8266 (NodeMCU)
- Used ultrasonic sensors to detect garbage level and automated lid control using a servo motor
- Integrated Firebase for real-time cloud monitoring and data updates
- Implemented serial communication between multiple microcontrollers for coordinated operation
- Tools: Arduino, ESP8266, Ultrasonic Sensors, Servo Motor, Firebase

Social Media Addiction Prediction System

- Built an AI-based system to predict social media addiction risk using user behavior data
- Preprocessed data and trained Logistic Regression and Random Forest models
- Used SHAP to explain model predictions and feature importance
- Developed a Flask web app with an interactive dashboard to display risk results and insights
- Tools: Python, Pandas, Scikit-learn, SHAP, Flask, HTML/CSS

Tourism Recommendation System - Sri Lanka

- Built a tourism recommendation system that suggests destinations based on user preferences Used filters such as budget, travel type, location, and activities for
- personalized results Created a simple and responsive user interface for input and
- recommendations Improved travel planning using smart recommendation logic Tools:
- Python, HTML, CSS, JavaScript
-

EDUCATION

BSc (Hons) in Computer Science with AI
Coventry University | NIBM(KIC)

2024--2027

G.C.E Advanced Level in Biological Stream

2022

St. Joseph's Balika College, Gampola

G.C.E Ordinary Level

2018

St. Joseph's Balika College, Gampola
